SUPPLEMENT

TO

Franken Brothers

AUTUMN CATALOGUE

1924

FRANKEN BROTHERS

Deerfield, Illinois

To enable our customers to secure the newer and rarer HOLLAND BULBS which we do not carry in stock, we issue this SUPPLEMENT containing a selection of the choicest varieties introduced in recent years.

Orders from the SUPPLEMENT must, however, be received before

JULY 10, 1924

and the bulbs to fill orders so received will be selected and separately packed in Holland.

After that date selections must be made from our GENERAL CATALOGUE sent herewith, which contains those standard varieties which we carry in stock during the planting season and which may be ordered at any time.

If bulbs are wanted from both supplement and catalogue, customers are advised to include the whole in one order before July 10th, and a discount of 2 per cent will be allowed on all such orders, amounting to \$5.00 or more, if accompanied by cash.

FRANKEN BROTHERS,
Deerfield, Illinois.

NARCISSI

Narcissi are probably the favorite flowers of the garden in early spring, and by proper selection of varieties the blooming season will reach from March until early May. Of the easiest culture in both house and garden, the massive trumpets of the Ajax section or the dainty blooms of the smaller varieties are alike satisfactory. The varieties named below are a selection of the best to be had in all classes.

TULIPS

DARWIN TULIPS

In modern times no tulips have aroused the admiration that have been accorded to the Darwins. Vigorous in growth with larger flowers and longer stems than any others, and at the same time exhibiting the most clear, delicate and beautiful colors of the family. Their colors range through all the shades of pink and red, from mauve to deep purple, violets and almost blacks. In the garden they show best planted in groups or clumps of ten or more of one variety and they need not be disturbed for several years. They bloom in May, long after all other Holland Bulbs have passed. For house decoration where soft colors and long stems are required they are simply unrivalled.

BYBLOEM, BIZARD AND REMBRANDT TULIPS

These odd tulips are the ones which started the Tulip-craze in 1635. They are all queerly striped and feathered and have long stems. They bloom at the same time with the Darwins. Bizards have dark stripes and feathering on a yellow ground. Bybloems have rose and violet stripes and feathering on a white ground. Rembrandt Tulips have the same queer stripes and feathering but there is a larger range of coloring. These tulips are very attractive and attract attention instantly.
